

NANCY K. BROWN

SUN PROTECTION

step 5
daytime

is A DAILY MUST - protect your precious asset, your skin, from the damage the sun and environment can do. **Everyday - during all seasons, all types of weather** - will keep your skin looking and feeling its best at any age.

SunDefense® natural mineral physical Shield

is a universal multi-functional self adjusting multi-active moisturizer / **physical sun-protector**, with natural minerals **Titanium Dioxide and Zinc Oxide**, helps in the prevention or minimization of long-term skin damage caused by environmental exposure and stresses. With Aloe Vera to sooth, hydrate and nourish. **Coral reef safe, environmentally and child friendly, no sunscreen chemicals, no nano-particles.**

- with moisturizers to seal in your skin's essential hydration
 - preventing loss to the environment
- with **broad spectrum SunDefense® physical sun-protectants** to help protect skin against the elements, **reflecting the sun's damaging rays away from skin**
- color self adjust technology, use alone as a light foundation, with your foundation or under make-up.

NANCY K. BROWN

- oil free, non-greasy
- environmentally friendly

2 formulations:

- **TINTED** - is a self adjusting universal skin tint for use with all skin tones, skin types & ethnicities
(blends completely into skin of any ethnic origin - Caucasian, Asian, South East Asian, African, etc.)

or

- **WHITE** - use all over face or around eyes - use White formulation to provide light reflecting foundation to minimize wrinkles & highlight eyes

- ➔ 20+ for moderate or occasional sun exposure
- ➔ 30+ for longer periods of sun exposure

skin types: all skin types, including oily and acne, especially those sensitive to sun screen chemicals

: for best results - apply your hydrator (step 4 - Aloe Vera Gel, Aloe Vera Pro Gel or Aloe Hydrant Essence first - do not allow hydrator to absorb, follow immediately with your Sun Defense Shield.
- allow Sun Defense Shield to set for about one minute
- if you want - follow with your favourite foundation and / or make-up

Sunscreens vs. Sun Shields? Which is better for environmental protection when you go outside?

- Hands-down the winners are Sun Shields - they are superior for the following reasons:
- do not contain sun screen chemicals (many people are or will become sensitized to these)
 - unlike sun screens, sun shields do not require application 25 - 30 minutes prior to sun exposure to be activated to offer environmental protection
 - offer immediate environmental protection upon application
 - general broad spectrum environmental protection
 - quality ones have natural sun reflecting minerals (Titanium Dioxide and Zinc Oxide)
 - good ones come in natural skin tone or white
 - good ones even-out skin tone and hide skin imperfections
 - are water resistant, are child safe, wear and last longer
 - wear like a light foundation by themselves
 - can be blended with your foundation or make-up
 - well formulated ones do not clog pores

Nancy K Brown's Sun Defense Shields meet and exceed all of the above criteria for superior environmental protection results.
